

# Albatross

## Tactical Unmanned Aircraft System

Albatross UAS can execute day/night, long endurance real time surveillance and reconnaissance (SAR) missions

- ◆ Military applications : day and night SAR/artillery adjustment/target acquisition and designation/battlefield damage assessments/communication relay/..etc
- ◆ Civilian applications : agricultural, fishery, and forest monitoring/traffic monitoring and control/nuclear contamination and environment monitoring/typhoon, oil pollution, forest fire disaster investigation/coastal guard/anti-smuggling... etc

Performance	
Cruise speed	60 kts
Ceiling	> 13000 ft
Endurance	> 10 hrs
Payload weight	> 100 lb
